THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail** **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 737 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 737 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Syed Ali (reg. no. 58,780) on 7/20/09. The amendments are to overcome minor objections to claims 10 and 16.

The application has been amended as follows:

AMEND THE FOLLOWING CLAIMS AS FOLLOWS:

10. (currently amended) A system for protecting a computer network, the system comprising at least one computer device, the at least one computer device having one or more modules, including:

a detection module configured to:

monitor one or more packets received from a source device to determine whether one or more of the received packets include one or more harmful computer code signatures, and to further monitor the received packets to determine whether one or more of the received packets include identifying information that has a history of being included in packets associated with one or more previous attacks directed at a target device coupled to the network; and

detect an attack directed at the target device if one or more of the monitored packets include one or more of the harmful computer code signatures, and to further detect the attack if one or more of the monitored packets include the identifying information that has the history of being included in packets associated with the previous attacks directed at the target device;

a scanning module configured to determine a severity of the detected attack directed at the target device;

a log creating module configured to create an attack profile based on information associated with the detected attack, wherein the attack profile provides identifying information included in the monitored packets that include the harmful computer code signatures, and wherein the attack profile further provides the identifying information that has the history of being included in packets associated with the previous attacks directed at the target device; and

a blocking module configured to:

block one or more of the monitored packets from being transmitted to the target device, wherein the blocked packets include the identifying information provided in the attack profile, and wherein the blocking module is further configured to disable a communication channel connecting the source device to the target device to block the packets from being transmitted to the target device;

block one or more subsequently received packets from being transmitted to the target device if the severity of the detected attack exceeds a predetermined threshold, wherein the subsequently blocked packets include

packets originating from the source device and packets directed to the target device;

notify a user if the source device originates internally to a defined perimeter of the target device, wherein the user is notified that the communication channel has been disabled and that the attack originated internally to the defined perimeter of the target device; and

enable the communication channel for at least one system that runs a valid application over the communication channel if the source device originates externally to the defined perimeter of the target device.

16. (currently amended) A computer device for detecting and preventing attacks directed at a target system, the computer device having one or more modules that cause the computer device to:

receive one or more packets originating from a source system, wherein the received packets are directed to the target system;

monitor the received packets to determine whether one or more of the received packets include one or more harmful computer code signatures, and further monitor the received packets to determine whether one or more of the received packets include identifying information that has a history of being included in packets associated with one or more previous attacks directed at the target system;

detect an attack directed at the target system if one or more of the monitored packets include one or more of the harmful computer code signatures, and further

detect the attack if one or more of the monitored packets include the identifying information that has the history of being included in packets associated with the previous attacks directed at the target system;

create an attack profile based on information associated with the detected attack, wherein the attack profile provides identifying information included in the monitored packets that include the harmful computer code signatures, and wherein the attack profile further provides the identifying information that has the history of being included in packets associated with the previous attacks directed at the target system;

block one or more of the monitored packets from being transmitted to the target system, wherein the blocked packets include the identifying information provided in the attack profile, and further to disable a communication channel connecting the source system to the target system to block the packets from being transmitted to the target system;

block one or more subsequently received packets from being transmitted to the target system if a severity of the detected attack exceeds a predetermined threshold, wherein the subsequently blocked packets include packets originating from the source system and packets directed to the target system;

notifying a user if the source system originates internally to a defined perimeter of the target system, wherein the user is notified that the communication channel has been disabled and that the attack originated internally to the defined perimeter of the target system; and

enable the communication channel for at least one system that runs a valid application over the communication channel if the source system originates externally to the defined perimeter of the target system.

The following is an examiner's statement of reasons for allowance: Independent claims 10, 16, 23, and 37 have been amended to recite subject matter that was indicated as allowable over prior art in the prior office action. The remaining claims are allowable over the prior art due to dependency on one of these aforementioned independent claims. Note that as per claim 10, the system being claimed is statutory because the at least one computer device being claimed as part of the system is a machine. One skilled having read paragraphs 36 and 56 and viewed Figure 1 in context of these paragraphs would understand that the term "devices" as used in the present application and having modules as recited in claim 10 are machines. Claim 16 is statutory for similar reasons--the claim is directed towards a computer device, which when interpreted in light of the specification, one skilled should understand is a machine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PONNOREAY PICH whose telephone number is (571)272-7962. The examiner can normally be reached on 9:00am-4:30pm Mon-Thurs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu can be reached on 571-272-3859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
